Handler® 140

115V Wire Feed Welder

217919
May 2013

#500559

Includes:

- Comfortable 10-ft. (3 m) H100S2-10 gun
- 10-ft. (3 m) work cable with clamp
- Built-in gas solenoid valve and dual-gauge regulator with gas hose
- Spool hub assembly accommodates 4 or 8 in. spools
- Sample spool of .030 in. (0.8 mm) self-shielding flux-cored wire
- .030 in. (0.8 mm) contact tips
- Power cord with plug
- Weld set-up chart
- Owner's manual with installation, operation and maintenance guidelines

Built with Hobart quality and durability, the Handler 140 is a wire welding package with industrial performance capable of operating on standard 115/120 volt, 20 amp home circuits. The broad output range of 25–140 amps allows you to weld 24 gauge up to 1/4 inch steel.

The Handler 140 is capable of running the following wires: .023–.035 in. (0.6–0.9 mm) mild steel or stainless steel, .030–.035 in. (0.8–0.9 mm) flux-cored, and .030 in. (0.8 mm) aluminum. Five output voltage settings with wire feed tracking make the unit easy to set and adjust for different materials and thicknesses.

Applications:

Home, farm and ranch and light fabrication projects.

- Mower Decks/Brackets
- Fences/Gates
- Kennels
- Signs
- Window Security Guards
- Grills/Smokers
- Firewood Racks
- Metal Furniture
- Machinery and Auto Repair, etc.

Features	Benefits
Excellent arc performance	Smooth, stable arc on all thicknesses.
Industrial cast aluminum wire drive system	Professional and durable wire feed performance.
Five-position voltage control	Five voltage ranges allow you to fine-tune the arc.
Dual-groove quick-change drive roll	Makes it easy to change from one wire size or type to another.
Weighs only 57 pounds	Easier to transport: increased ability to weld where you need to weld.
Convenient polarity changeover	Access makes it quick and easy to change polarity between solid or tubular wire.
Sloped control panel	Increased visibility to the user interface makes adjustments easier.
Self-resetting thermal overload protection	Protects power transformer from thermal overload to ensure reliability.
Hobart's 5/3/1 Industrial Warranty	Better protection for your investment; up to five years on critical components.
Designed, assembled, serviced and supported in Troy, Ohio USA	Industrial-quality products with time-tested reliability since 1917.

Specifications (SUBJECT TO CHANGE WITHOUT NOTICE.)

Rated Output	Current Range	Max. Open-Circuit Voltage	Wire Feed Speed Range	Amps Input at Rated Output, 60 Hz, 1-Phase			Dimensions	Net Weight

Certified by Canadian Standards Association to both the Canadian and U.S. Standards.

Handler 140 Welding Guide

Settings are approximate. Adjust as required. Thicker materials can be welded using proper technique, joint preparation and multiple passes.

Recommended Voltage and Wire Speed Settings for thickness of metal being welded. Number on left of slash is Voltage Setting/Number on right of slash is Wire Feed Setting.

Material Being Welded	Wire Type and Polarity Setting	Suggested Shielding Gas 20–30 CFH Flow Rate	Diameter of Wire Being Used	24 ga. .024 in. (0.6 mm)	20 ga. .036 in. (0.8 mm)	18 ga. .048 in. (1.2 mm)	16 ga. .060 in. (1.6 mm)	12 ga. .105 in. (2.7 mm)	10 ga. .135 in. (3.4 mm)	3/16 in. (4.8 mm)	1/4 in. (6.4 mm)	CHANGING POLARITY
Steel	Flux Core E71T-11 (DCEN)	No Shielding Gas Required Good for windy or outdoor applications.	.030" (0.8 mm)	—	—	1/30	2/30	3/40	3/45	4/50	5/50*	DCEN Electrode Negative for Flux-Cored Wire

			.030" (0.8 mm)	—	—	—	2/100**	4/100**	—	—	—	

Match feed roll groove to diameter of wire being used. Set tension knob setting to 3 at start. Adjust tension per instructions in the manual.

CAUTION! Do not change voltage switch position while welding. See owners manual for more information.

Wire speed listed is a starting value only. Wire speed setting can be fine-tuned while welding. Wire speed also depends on other variables such as stick out, travel speed, weld angle, cleanliness of metal, etc.

*Multiple passes required.

**Aluminum wire is soft so feedability is not as good. Make sure that hub tension is not too tight and keep the torch as straight as possible. A "push angle" for the torch is recommended.

Control Panel

1. Power Switch
2. Wire Speed Control
3. Voltage Control Switch
4. Over Temp Light

Performance Data

Accessories

H100S2-10 Replacement MIG Torch #245924

Comes in 10-ft. (3 m) length with liner for .030-.035 in. (0.8-0.9 mm) diameter wire.

Small Cart/Cylinder Rack #194776

Designed for portable MIG welders. Accommodates large and small gas cylinders.

Running Gear/Cylinder Rack #770187

Heavy-duty construction. Accommodates large and small gas cylinders

Protective Cover #195186

Weather-resistant nylon resists stains and mildew while protecting the finish of your welder.

Consumables
