Handler® 210MVP

115/230V Wire Feed Welder

250822
Jan. 2013

#500553

Includes:

- Comfortable 10-ft. (3 m) H100S4-10 gun
- 10-ft. (3 m) work cable with clamp
- Built-in gas solenoid valve and dual-gauge regulator with gas hose
- Spool hub assembly accommodates 4 or 8 in. spools
- Sample spool of .030 in. (0.8 mm) self-shielding flux-cored wire
- .030 in. (0.8 mm) contact tips
- Power cord with 5-15P (115 V, 15 A) and 6-50P (230 V, 50 A) MVP plugs
- Weld set-up chart
- Owner's manual with parts lists, installation, operation and maintenance guidelines

The Handler 210MVP is the one portable MIG welder that has 210 amps of welding power packed into a portable case! Powerful output to handle 3/8 inch thick mild steel and enough control for 24 gauge material.

The Handler 210MVP is recommended for running the following wires: .023–.035 in. (0.6–0.9 mm) mild steel or stainless steel, .030–.045 in. (0.8–1.2 mm) flux-cored, and .030–.035 in. (0.8–0.9 mm) aluminum. Seven output voltage settings and infinite wire feed speed control make the unit easy to set and adjust for different materials, thicknesses and wires.

Optional
SpoolRunner™
100 Spool Gun

An integrated spool gun control circuit allows direct plug-in for the optional SpoolRunner™ 100 spool gun. The spool gun eliminates wire

feeding problems associated with soft aluminum wire and also runs mild or stainless steel wire. A selector switch for MIG gun or spool gun operation makes switching guns quick and easy.

Features	Benefits
Max 210 amps in small portable case	Sized for transport of the unit to the jobsite and the power to weld 3/8 in. mild steel.
7 (230 V) and 4 (115 V) voltage settings, with infinite wire feed speed control	Offers easier fine control of the output parameters for improved arc performance with less spatter for a better bead appearance and less clean up.
Accepts uncomplicated, simple-to-install direct plug-in SpoolRunner™ 100 Spool Gun	Spool guns enhance feedability and reduce "bird-nesting" associated with soft aluminum wires.
Integrated spool gun control circuitry is standard	No additional control box or adapter is required to connect the SpoolRunner 100 spool gun.
Dual-voltage capability with MVP™ (Multi-Voltage Plug)	Allows you to connect to common 115 or 230 V power receptacles without the use of any tools—simply choose the plug that fits the receptacle.
Door chart with initial settings	Quickly reference initial settings for different wires, gases, materials and thicknesses. Provides quick starting point for novices and professionals alike.
Built-in contactor	Eases use and excellent safety feature which makes wire electrically "cold" until trigger is pulled.
Durable feed head with quick-release drive roll tension lever	Positive feed with adjustable tension plus easy accessibility to thread new wire.
Convenient polarity changeover with tip holder	Access makes it quick and easy to change polarity for solid or tubular wire. Includes convenient storage holes for spare tips.
Dual-groove quick-change drive roll	Makes it easy to change from one wire size to another. One knurled groove and one smooth groove for .030–.035 in. (0.8–0.9 mm) wire.
Short circuit protection	Protects unit against current overload.
Self-resetting thermal overload	Protects power transformer to ensure reliability.
Current-limited motor protection	Protects wire feed system from overload, no fuses to change or circuit breaker buttons to reset.
Hobart's 5/3/1 Industrial Warranty	Five-year warranty on transformers, three years on electronics (drive motors, rectifiers) and one year on guns.

Specifications (SUBJECT TO CHANGE WITHOUT NOTICE.)

Input Power	Rated Output	Current Range	Max. Open-Circuit Voltage	Wire Feed Speed Range	Amps Input at Rated Output, 60 Hz				Dimensions	Net Weight

Match feed roll groove to diameter of wire being used.
Set tension knob setting to 3 at start.
Adjust tension per instructions in the manual.

CAUTION! Do not change voltage switch position while welding. See owners manual for more information.

Wire speed listed is a starting value only. Wire speed setting can be fine-tuned while welding. Wire speed also depends on other variables such as stick out, travel speed, weld angle, cleanliness of metal, etc.

*Multiple passes may be required depending on the application and joint design.

**Aluminum wire settings are with the spool gun attached. A spool gun eliminates many feedability issues associated with the soft aluminum wire. A "push angle" for the torch is normally recommended for aluminum.

Accessories

SpoolRunner™ 100 Spool Gun #300796

- 10-ft. (3 m) cable
- Weld 18 gauge – 1/4 in. (1.2–6.3 mm) aluminum with the Handler 210MVP
- Rated 150 amps, 60% duty cycle
- For .023–.035 in. (0.6–0.9 mm) aluminum, steel and stainless steel wire on 4 in. (102 mm) diameter spools
- Includes rugged plastic carrying case
- Shipped with three .030 in. (0.8 mm) and three .035 in. (0.9 mm) contact tips

H100S4-10 Replacement MIG Torch #245926

Comes in 10-ft. (3 m) length with liner for .030–.035 in. (0.8–0.9 mm) diameter wire.

Small Cart/Cylinder Rack #194776

Designed for portable MIG welders. Accommodates large and small gas cylinders.

Running Gear/Cylinder Rack #770187

Heavy-duty construction. Accommodates large and small gas cylinders.

Protective Cover #195186

Weather-resistant nylon resists stains and mildew while protecting the finish of your welder.

The following accessories are available through Miller/Hobart Service Distributors.

MVP™ Adapter Plugs

#219 261

For Power Cable 5-15P (115 V/15 A). Included with machine.

#219 258

For Power Cable 6-50P (230 V/50 A). Included with machine.

Typical Installation for Optional SpoolRunner™ 100 Spool Gun to Handler® 210MVP

It's quick and easy to install the SpoolRunner 100 Spool Gun on the Handler 210MVP. Just plug the power pin of the spool gun into the feedhead, attach the trigger lead, and flip the switch on the inside panel for spool gun operation. Install the correct wire and gas for the job and it's ready to go.
