

Stickmate® 205 AC

AC Stick (SMAW) Arc Welding Power Source

■ 15-ft. (4.5 m) electrode cable with heavy-duty holder

■ 10-ft. (3 m) work cable with clamp

Power cord with plug

he Stickmate 205 AC Stick welding power sources have the control to get the exact heat you need — always. Also, these machines allow weld time to increase when amperage decreases.

They have the range and muscle to handle many Stick welding, hard surfacing, and cutting jobs. At the same time, they have the precision for low hydrogen and special alloy electrodes. Recommended for a variety of electrodes 1/16-5/32 in diameter.

Accu-Set[™] design provides accurate heat control with infinite amperage control. This Stick welder also allows a higher duty cycle when amperages decrease to give you more arc time when welding thinner materials.

Applications:

- Farms
- Ranches
- Hobbyists Maintenance
- Ornamental Iron
- Individuals
- Garages

Features	Benefits				
Accu-Set™ amperage indicator	Accu-Set is an exclusive design for accurately controlling amperage or heat output.				
Infinite current control	The precise control of the Stickmate allows the operator to adjust output by as little as 1-amp increments. Adjustm can be made while welding to achieve desired heat level, unlike the step control design on competitive products.				
Increasing duty cycle	Duty cycle increases as amperage setting decreases. 100% duty cycle at 90 A, 25 V.				
Max. 80 open-circuit voltage	Assists with arc starting and arc stability.				
Fully varnished magnetic coils	Varnish protects and lengthens the life of the coils inside for increased reliability.				
Forced-draft cooling fan	The cooling fan runs continuously and helps to extend the life of the power source.				
Hobart's 5/3/1 Warranty	Five-year warranty on transformers, stabilizers and generators; three years on electronics (drive motors, rectifiers); and one year on guns.
